WHAT IS VIDEO EDITING?

The art of arranging visuals to tell a compelling story, editing is not just trimming it's constructing rhythm, flow and meaning

A video editor is an emotions engineer (can create feelings through visuals) and a good communicator.

CORE PRINCIPLES OF VIDEO EDITING: That Make or Break Your Video

1

Storytelling

clarity, continuity, and message (making the viewer feel everything flows naturally)

2

Pacing

controlling energy and emotion through rhythm

3

Visual composition

framing, symmetry, and focus (The rule of thirds, leading lines, headroom, shot sizes)

4

Sound design

the layer that makes visuals come alive (music, voice, silence = mood)

5

Consistency

brand tone, fonts, colors, transitions

CREATIVITY IN EDITING

Creativity in Video Editing Is Not Magic — It's Discipline + Discovery + Pattern + Emotion

- Creativity is about choice; what to hide, what to emphasize
- Use emotions as your editing compass. Think of editing like music; balance silence & sound
- Always ask: what do I want my audience to feel?
